

Troubleshooting Mixed Java & Scala WOLips Projects

Make sure the scala builder comes before the wolips incremental builder. Set this in the Properties window:

Or in the .project file:

```
<?xml version="1.0" encoding="UTF-8"?>
<projectDescription>
  <name>Slowmation</name>
  <comment></comment>
  <projects>
  </projects>
  <buildSpec>
    <buildCommand>
      <name>org.scala-ide.sdt.core.scalabuilder</name>
      <arguments>
      </arguments>
    </buildCommand>
    <buildCommand>
      <name>org.objectstyle.wolips.incrementalbuilder</name>
      <arguments>
      </arguments>
    </buildCommand>
  </buildSpec>
  <natures>
    <nature>org.scala-ide.sdt.core.scalanature</nature>
    <nature>org.eclipse.jdt.core.javanature</nature>
    <nature>org.objectstyle.wolips.incrementalapplicationnature</nature>
  </natures>
</projectDescription>
```
