

Mailing Lists

The most active WebObjects mailing list is Apple's [webobjects-dev](#) (for general WebObjects discussion).

Essential

- [Apple hosted discussion about WebObjects development](#)

Beneficial

- [Project Wonder Discussion mailing list](#)
- [Apple hosted discussion about deploying WebObjects applications](#)
- [Apple new WO \(as of 2011/04/16\) support forum](#)
- [wonder-commit mailing list](#) (send an email to wonder-commits-on@wocommunity.org to subscribe)
- [WOCCommunity on Twitter](#)

@Deprecated

By all means, search and browse these deprecated mailing lists when looking for solutions, but **please do not post new messages** to the deprecated mailing lists. These lists are considered obsolete and are no longer used. Use the lists detailed above for posting new messages. If you post a message to one of these deprecated lists, very few people will see it. It is like being alone in a dark room asking for help. You have been warned.

- [Omni Group WO-dev mailing list](#) (deprecated. Use Apple's [webobjects-dev](#) list instead)
- [Project Wonder Subversion Commit Messages](#) Since Project Wonder moved to GitHub, this mailing list is deprecated. Use the Commit RSS feed for the [Project Wonder GitHub project](#) to track changes to Wonder or subscribe to the wonder-commits mailing list.
