 - [Velocity Users Guide](#)
 - [Article and example of Velocity usage](#)
- EOModel value [reference](#) for template customization
- [Tips and Tricks](#)
- The Current Official WOLips Velocity EOGenerator Templates
 - Standard (non-Wonder) Templates
 - [_Entity.java](#)
 - [Entity.java](#)
 - Wonder Templates
 - [_WonderEntity.java](#)
 - [WonderEntity.java](#)
 - Consolidated Wonder Templates with "Clazz" pattern (Ramsey Gurley)
 - [_WonderEntity.java](#)
 - [WonderEntity.java](#)
- Mike Schrag's Templates
 - [_Entity superclass template](#)
 - [Entity subclass template](#)
- ERCoreBusinessLogic templates showing off the "Clazz" pattern
 - [_Entity superclass template](#)
 - [Entity subclass template](#)
- Oswaldo Bueno's FetchSpecification Addition
 - [_Entity superclass addition](#)
- Pierre Frisch's Templates w/sPearCat Additions
 - [_Entity superclass template](#)
 - [Entity subclass template](#)
- Pierce Wetter's addition to count to-many destination objects without loading all the destination objects.
 - [_Entity superclass addition.](#)
- David Avendasora's Java Client Templates & EOGenericRecord classes
 - **Server-Side Classes** (Requires Project Wonder)
 - [_EntityServer.java template](#)
 - [EntityServer.java template](#)
 - **Client-Side Classes**
 - [EOGenericRecord additions](#)
 - [Session.java additions](#)
 - [_EntityClient.java template](#)
 - [EntityClient.java template](#)
- Florijan Stamenkovic's JBND-aware Java-Client Templates
There are only Client-Side Class JBND-specific templates. You can use any Server-Side Class templates you wish.
 - **Client-Side Classes**
 - [_EntityClient.java template](#)
 - [EntityClient.java template](#)
- Ravi Mendis' basic (proof-of-concept) Scala Templates
 - EOF Scala Templates
 - [_Entity.scala template](#)
 - [Entity.scala template](#)
 - [Squeryl](#) Templates
 - [_Entity.eotemplate template](#)
 - [Entity.eotemplate template](#)
- John Huss' complete SCALA Templates (basically a translation of the java WonderEntity template with the addition of Option accessors for optional properties)
 - [ScalaEntity.scala](#)
 - [ScalaEntity.scala](#)

Rubicode's Legacy EOGenerator (WO 5.3 and before) - Obsoleted by OS X Leopard and WO 5.4

Deprecated

The original EOGenerator will not work with OS X 10.5 or higher since the Cocoa-Java Bridge framework has been deprecated. You should only use it for compatibility with older projects. All new development should be done with the Velocity EOGenerator built into WOLips.

- [EOGenerator's Home](#)
- Basic setup [instructions](#)
- Template [addition ideas](#) (only for Rubicode's EOGenerator, but should be able to be translated to either JavaEOGenerator or Veogen)
- Jonathan Rentzsch's Templates
 - [_Entity superclass](#)
 - [_Entity superclass \(ContentContext Aware\)](#)

- Entity subclass
