

Two new podcasts from WOWODC 2010

Hello everyone,

Just the vast majority of the community is using Wonder, we are releasing the Getting Started with Project Wonder recording from WOWODC 2011 for free. It's a really good intro to Wonder and to properties management. Many thanks to Kieran for this!

Also, you will find a recording of Aurélien Minet's presentation of the Cocktail Association ERP for high education. It might be one of the biggest WO installation outside Apple, and it's open source too.

Just a note about the Cocktail presentation. I can't view the video in iTunes or QT Player 7, but it works in Safari or the new QuickTime Player. I don't know why since I can play the source works in QT Player 7. Maybe a 10.6.5 bug or something. So if you can't view it in iTunes, open it up in QT Player.

Check out the [Screencasts](#) page to get access to the podcasts.
