

# Database Compatibility and Comparisons-Informix

Calven Eggert

For those interested your connection string from the client should look like this:

```
jdbc:informix-sqli://ip:port/dbname:informixserver=servername;user=username;password=password
```

The driver name currently is:

```
com.informix.jdbc.IfxDriver
```

This is the link that describes in detail the connection string:

<http://publib.boulder.ibm.com/infocenter/idshelp/v10/index.jsp?topic=/com.ibm.jdbc.doc/jdbc52.htm>
