3.0

- Unification of Maven plug-ins and Ant tasks base code to build WO projects

WOLips Wizard

- Support for D2W projects
- Support for JavaClient projects
- Support for q4e and m2eclipse

Maven WOLifecycle Plug-in

- Replace Ant tasks by Java code
- Fix bugs
- Option to auto generate classes based on EOModels
- Support for JavaClient stuff?
 - Possibly leverage maven webstart plugin <http://coffeebreaks.org/tmp/maven-staging/webstart/site/>
- Update the documentation
- Generate SQL scripts based on EOModels
- Goal to run WO applications from Maven (can be useful to run Selenium tests, for instance)

Maven WOBootstrap Plug-in

- Support for Apple nightly builds structure
- Goal to update time zone data on WO jars

Maven JavaMonitor Plug-in

- Support for JavaMonitor deployment

Archetypes

- Merge Apple archetypes and WOProjects archetypes to provide support for jar, woframework, woapplication and war?
- Publish an archetype catalog for use in the m2eclipse project wizard
- Support for JavaClient projects?
- Support for Direct To Web projects
- Support for Direct To WebServices
- Update the documentation

Wonder

- Nightly builds for Wonder using Maven

- ~~Provide a repository with Wonder libraries~~
- ~~Produce source artifacts to be attached on Eclipse~~
- Configuration to create a package with all Sources and Resources

General WebObjects/Maven Documentation

Need we say more?

WOWODC 2009

~~Could we talk a little bit about WO and Maven on the next WOWODC?~~ 😊
