

Project WONDER-Frameworks-Ajax-AjaxAutoComplete

AjaxAutoComplete

AjaxAutoComplete works much like WOTextField except that it supports a auto-completion popup list box. A demo of the raw Scriptaculous version is available [here](#).

Wonder Bindings

- list (required) - the list of possible values (similar to WORepetition)
- value - the value currently typed into the text field
- item - the repetition item value (similar to WORepetition)

Scriptaculous Bindings

[Scriptaculous Documentation](#)

- tokens
- frequency
- minChars
- indicator
- updateElement
- afterUpdateElement
