

# Project WONDER-Frameworks-Ajax-AjaxAccordion

## AjaxAccordion

AjaxAccordion provides a wrapper around the [Rico](#) framework's accordion control. A demo of the control is available [here](#).

The WO version consists of an AjaxAccordion component that contains a series of AjaxAccordionTab components. See the AjaxExamples example project for more information on the CSS styles that can be applied to the tabs.

**Note:** The actual component name is spelt with an 'o' ie) AjaxAccordi\*o\*n and AjaxAccordi\*o\*nTab

## Wonder Bindings

- id - the ID of the accordion element
